Visitor Lobby Software

Enhancing Building Security using MICROTRONIC Lobby Guard

Public buildings have always been a highly accessible target for theft and related crime. Lobby Guard is a computerized **Visitor Management** program designed to account for and screen the thousands of visitors, contractors, volunteers and employees passing through your doors each year.

- **Secure Sign In and Sign Out**
Provides a quick, easy, and highly secure method for visitors to sign in and out of your building.
- **ID Badge Printing**
Prints a visitor badge with the visitors photo.
- **Detailed Activity Reporting**
Records all activity in a secure database for future reference and reporting. Eliminates paper logbooks!
- **Instant Background Checks**
Can instantly check all visitors against sex offender registry and your own database of unwanted guests. If a match is made, notification can be sent to appropriate personnel.
- **Employee Time & Attendance**
[Optional] Can track and report on employee hours.
- **Inventory and Theft Control**
Helps prevent theft by requiring vendors to follow sign-in procedures and keeping a detailed record of when they entered and left your facility.

You can even enter your own customized list of names to keep out former employees, solicitors, and other unwanted guests. In addition, the program can integrate with existing **access control** and building security systems to further ensure your safety.

"We were experiencing problems of theft. Since we've had a higher level of accountability with Lobby Guard, we have not experienced any thefts." - Tina Ingram, Director of Security, **Durham Public Schools**

"The time saved by using Lobby Guard over manual log-in books is phenomenal. The assurance provided by having a photograph of all adult visitors offers a greater sense of security." - Joyce Adams, **Greys Creek High**

Lobby Guard is currently in use at **corporate headquarters, hotels, resorts, real estate offices, private estates, and data centers** across the United States, United Kingdom, and Australia.

We would like the opportunity to have one of our building security experts personally demonstrate Lobby Guard's unique features. **Show visitors that you're serious about safety.**

Self-Service Visitor Management

LOBBYGUARD™

Sign In. Sign Out. Secure.

Secure Your Facility

The LobbyGuard Kiosk is a self-service visitor management system designed to help public and private institutions maintain control and more effectively manage their employee and visitor activity. LobbyGuard records all visitor and employee traffic details, runs instant background checks, prints photo ID badges, and provides access to a full range of visitor traffic reports from anywhere on the web.

LobbyGuard Kiosk gives your facility complete self-service visitor sign-in and 24x7 security

No Front Desk Personnel Required
Stand-alone, self-service kiosk allows you to sign visitors in and out with absolutely no staff involvement.

All-In-One Unit
Includes all of the security hardware you need. Just plug the LobbyGuard Kiosk into a standard outlet and you're ready to go!

Notifies Employee of Visitor
LobbyGuard instantly notifies your employees of visitor arrival via email or text message.

LobbyGuard Captures More Information than Any Other System
Record visitor photo, driver's license, reason for visit, time and date of visit, person being visited and much more.

Unlimited Scalability
Network multiple kiosks together at key entrance points or facilities for the ultimate in visitor tracking.

Touchscreen Monitor
No keyboard or mouse. Easy and convenient touchscreen interface.

Audio Speakers
Professionally-recorded audio prompts provide step-by-step instructions.

Camera
5 megapixel camera captures a clear photo of each visitor.

License Scanner
Captures information from all 50 states + 600 other ID formats.

Badge Printer
Quickly prints custom badges with photo, name, and time.

Barcode Scanner
Scan the bar code on the visitor badge to instantly sign out.

INSTANT BACKGROUND CHECKS

All visitors can optionally be screened against national criminal databases and/or your own Red Flag List of unwanted individuals.

LobbyGuard instantly alerts your security personnel in the event of a background failure.
